

, R16 (1976) year unknown Publication Date 11/1/1976 Publisher ASME Number SM7-2a-76, 1-2 Pages Taschenweise A: This is the proper way to do things. I made this with VBA ( and because the site I was scraping was new and hadn't been indexed, you may have trouble pulling from the table you get if you are not getting the index (in your case, Part C of the "General" table). Sub ExtractData() Dim HTML As HTMLDocument, x As Long, y As Long, z As Long Dim F As Range Dim DT As ListObject Set HTML = New HTMLDocument 'Workbook to save data to Set f = ActiveWorkbook 'Check if workbook already opened If Len(ActiveWorkbook.Name) > 0 Then MsgBox "This worksheet is already open! Please save and close the current workbook before proceeding." Else 'Close and save the current workbook ActiveWorkbook.Save ActiveWorkbook.Close False MsgBox "This worksheet is now closed!" End If With ActiveWorkbook.Worksheets("Sheet1").Cells.Format .Borders(xlInsideHorizontal).LineStyle = xlContinuous .Borders(xlInsideHorizontal).Weight = xlThin .Borders(xlInsideHorizontal).ColorIndex = 0 .Borders(xlInsideVertical).LineStyle = xlContinuous .Borders(xlInsideVertical).Weight = xlThin .Borders(xlInsideVertical).ColorIndex = 0 End With With Sheets(1) 'Find all data-filled cells For x = 2 To ActiveWorkbook.Worksheets("Sheet1").UsedRange.Columns.Count + 1 For y = 2 To ActiveWorkbook.Worksheets("Sheet1").UsedRange.Rows.Count + 1
